

DO YOU LIVE WITH PLANTAR FIBROMATOSIS?

Learn more about EN3835-309 PFI STRIDE, a clinical study of an investigational drug

If you have plantar fibromatosis (PFI) and are currently experiencing foot pain, you may be eligible for a clinical research study. EN3835-309 PFI STRIDE is a clinical study of an investigational drug which may be able to reduce PFI-associated pain.

The purpose of this study is to evaluate whether the investigational drug, EN3835, is effective, safe and tolerable among those with PFI.

You may be able to join EN3835-309 PFI STRIDE if you:

- Are an adult at least 18 years of age
- Have been diagnosed with PFI and have ≤ 2 nodules on your foot
- Have current foot pain due to PFI

There are additional criteria that need to be met to participate in EN3835-309 PFI STRIDE, which the study team will discuss with you further.
